Subj: Removal PRP (AOC/CO) Report: Odessa Drum Company Site
Odessa, Ector County, Texas
TDD#: T06-9301-009
PAN: ETX1120RCA
Lat: 31°56'13" N
Long: 102°23'54" W

The Region 6 Environmental Protection Agency-Emergency Response Branch (EPA-ERB) was tasked to provide support during removal activities by the Potential Responsible Party (PRP) at the Odessa Drum site located in Odessa, Ector County, Texas. Specific elements of the TDD include: 1) maintaining logbook of all site visits, meetings, etc.; 2) conducting site visits as necessary; 3) conducting file researches; 4) providing technical knowledge of previous removal activities; 5) providing other duties as sites conditions warrant; and 6) providing all other SOPs. The coordinates were obtained from the USGS Odessa NW Quad, 7.5 min series.

On November 11, 1993, TAT member Maher Tanbouz met with EPA On-Scene Coordinator (OSC) Greg Fife and representatives from the PRP's steering committee at the Odessa Drum site in Odessa, Texas. TAT; OSC Fife; Mr. Richard J. Walsh, Phillips Petroleum Company; Mr. Jack E. Williams, Phillips Pipe Line Company; Mr. Paul M. Bohannon, ESQ; Mr. Daniel J. Hollmann, ESQ; Mr. Murray A. Crutcher, Landgraf Crutcher and Associates, Inc.; Mr. Richard Finley, Champion Technologies, Inc.; and Mr. Rick Dolan, Geo-Monitoring Services, were touring the site. According to OSC Fife the site seemed to be vandalized because all electrical wires were striped off the walls, and the fence was damaged. The OSC informed the steering committee that drums and soil should be addressed during the removal activities and that continuous ambient air monitoring would be required for the duration of the removal.

OSC Fife directed the steering committee to submit a bi-weekly report during the removal activities. He also told the steering committee that during the PRP's removal activities the following should be considered:

- 1) Address all full/empties drums;
- 2) Grid the site for soil sampling and provide split samples;
- 3) Remove contaminated soil;
- 4) Provide wipe samples from concrete floor;
- 5) Collect composite soil samples off-site, along Alice road;
- 6) Provide continuous air monitoring and provide air samples during soil removal; and
- 7) Provide a work plan subject to EPA review.

According to OSC Fife, TAT will periodically visit the site when requested by the OSC.

During this reporting period no removal activities were implemented.

On September 27, 1994, OSC Fife directed TAT to close this TDD and to submit a final letter report as no removal activities are scheduled to start prior to the TDD completion date.
